TORUS™ soluble animal health supplements

TORUS™ has added a range of soluble animal health supplements for cats and dogs for use with the highly popular and unique TORUS™ watering bowl system including electrolytes, immune support, joint health and probiotics

- TORUS™ **Electrolyte** tablets are specifically formulated to help maintain normal fluid balance in the blood and tissues.
- For a proactive approach to immune health, TORUS™ offers an **Immunity** formulation that fights free radicals, helping support the immune system.
- To support and maintain a healthy digestive tract the TORUS™ **Probiotic** formulation contains 200 million colony-forming units of live (viable), naturally occurring microorganisms.
- The TORUS™ **Joint** health formula helps maintain normal healthy cartilage and joint function.

All of the products are veterinarian-formulated and based on science to provide essential nutrients for pets.

For use in both 1L and 2L TORUS™ watering bowls

2nd Best Pet Care & Accessory Product, Anido, Belgium

TORUS™ is a watering system, portable storage bowl and supplement dispenser in one!

New Premium Look!

What is TORUS™?

NEW
2L PINK

TORUS™ is a watering system, portable storage bowl and supplement dispenser in one!

TORUS™ watering bowls store up to 2L or ½ gallon of water inside their reservoir walls, filtering the water as it automatically dispenses. Its large capacity means less filling and its low profile means less spills or mess.

TORUS™ has lock, fill and drink functions making it ideal for travel. TORUS™ does not require batteries or a power source and has a 12 month warranty. TORUS™ watering bowls come in two sizes, 2L or ½ gallon, which is ideal for multi-pet homes and larger pets and a 1L or ¼ gallon, which is perfect for smaller pets. Each bowl comes with one carbon filter and the range includes replacement filters and a range of soluble animal health supplements.

The benefits of TORUS™

- 1L and 2L stored water capacity
- Ergonomic, robust and durable design
- Auto refills without batteries
- 12 month warranty
- Filters water as it dispenses
- Designed in New Zealand
- Lock function for portability
- Made from BPA-free food grade material
- Monthly replacement filters
- Easy Cleaning

Why use TORUS™?

Pets need plenty of fresh, clean water every day to remain healthy

Conventional water bowls often contain a small amount of water which can be further reduced by evaporation or spills leading to your pet being denied its daily drinking needs. Stagnant water is prone to dirt and dust. Insufficient water consumption or dirty water can lead to illness.

Watering systems or Fountains provide flowing water but need batteries or a power source and are expensive and bulky, making portability very challenging.

TORUS (Latin for 'hollow circular ring') stores its water inside the reservoir walls, ensuring an ample supply of water, protected from dust and contaminants. Each time your pet takes a drink, replacement water automatically flows from the storage area into the drinking well. Active carbon in the replaceable filter reduces flavors and trace elements commonly presented in municipal water supplies.

Use TORUS™ watering bowls to dispense the TORUS™ soluble animal health supplements which include Joint, Immunity, Probiotics and Electrolytes.

TORUS™ is exceptionally stable. Low profile geometry and soft rubber feet help prevent accidental spills by boisterous pets or passers-by. The water level in the drinking well is always high enough to allow easy drinking, but low enough to minimize water spills and splashes. The water can even dispense in moving vehicles.

TORUS™ watering bowls are a go-anywhere bowl that doesn't require batteries or power supply. The valve position, when locked, secures stored water inside the walls so you can take TORUS™ with you wherever you go.

www.toruswaterbowls.com

1. Align the cap arrow with the tap symbol and lift the cap straight up to remove it.
2. Insert the TORUS™ carbon filter or soluble animal health supplement by dropping the cartridge/basket into the place as shown.

3. Hold TORUS™ horizontally and fill the reservoir with water through the opening.
4. Replace the cap by aligning the arrow with the tap symbol and inserting the cap back into TORUS™.

5. To release a flow of water into the drinking well, align the cap arrow with the 'flow' symbol.
6. To transport your TORUS™, align the cap arrow with the 'padlock' symbol to lock the water supply within the walls of TORUS™ and prevent the flow of water into the drinking well.

1. Stored water is contained inside the TORUS™ walls.
2. Fresh water is drawn from the walls through the carbon filter.
3. The filtered water flows out into the drinking well where it is kept at an optimum level.
